

My name is Wayne K Crothers. I am concerned about the FCC giving waivers to companies asking not to provide cell phone compatibility with TTYs because for one I travel a lot and should i brake down it would help in getting help also should there be an accident on the road or some emergency i would be able to get help with out it you have to sit and wait,I cant use a cell phone now because i cant hear dial tones or if some one answers the phone or there is a busy signal so please don't give any more time or waivers to the's companies they had there time. They get the job done or fine them and make them do what they should of done years ago.

Thank you.

Wayne K Crothers
